

JavaScript DOM Assignment #1 – DOM Basics

Scenario

You have started learning the Document Object Model (DOM). Using DOM, JavaScript can read, change, and control HTML elements.

In this assignment, you will practice:

- Selecting HTML elements
 - Changing text using JavaScript
 - Handling button click events
 - Connecting JavaScript with HTML
-

Task 1: Change Text Using JavaScript

1. Create a heading in HTML with text:
 2. Hello World
 3. Using JavaScript:
 - Select the heading
 - Change its text to:
 - Welcome to JavaScript DOM
-

Task 2: Change Paragraph Text on Button Click

1. Create a paragraph with text:
 2. This is a paragraph
 3. Create a button with text:
 4. Change Text
 5. When the button is clicked:
 - Change the paragraph text to:
 - Paragraph text changed!
-

Task 3: Change Background Color on Button Click

1. Create a button with text:
2. Change Background
3. When the button is clicked:
 - Change the page background color to light blue.

Task 4: Show Alert Message on Button Click

1. Create a button with text:
2. Show Alert
3. When the button is clicked:
 - Show an alert message:
 - DOM is working!

Task 5: Update Text Using Input Field

1. Create:
 - One input field
 - One button with text:
 - Update Text
 - One paragraph
2. When the button is clicked:
 - Read the value from the input field
 - Display it inside the paragraph

Instructions for Students

- Use `document.getElementById()`
- Use `innerText` or `textContent`
- Use `onclick` for button click events
- Test all tasks in the browser

Submission Instructions (GitHub)

1. Create a **public GitHub repository**
Name format:
2. YourName_DOM_Assignment-1
3. Upload your files:
 - index.html
 - script.js
4. Enable **GitHub Pages**:
 - Go to **Settings** → **Pages**
 - Source: main
 - Folder: /root
 - Save and copy the **live link**
5. Submit on **Google Classroom**:
 - ✓ GitHub Repository Link

- ✓ Live Website Link

⚠ **ZIP file submission is NOT allowed**

What You Will Learn

- What DOM is
- How JavaScript selects HTML elements
- How JavaScript changes text and styles
- How button click events work
