

JavaScript DOM Assignment #2 – Element Selectors

Scenario

Now you will learn how JavaScript **selects HTML elements** using different selectors. Selecting elements is the **first step** before changing text, style, or behavior.

In this assignment, you will practice:

- Selecting elements by **tag name**
 - Selecting elements by **class name**
 - Selecting elements by **ID**
 - Using `querySelector` and `querySelectorAll`
-

Task 1: Select Element by ID

1. Create a heading with an ID:
 2. `Welcome Student`
 3. Using JavaScript:
 - Select the heading using `getElementById`
 - Change its text to:
 - `DOM Element Selected by ID`
-

Task 2: Select Elements by Tag Name

1. Create **three paragraphs** with different text.
 2. Using JavaScript:
 - Select all paragraphs using `getElementsByTagName`
 - Change the text of the **first paragraph** to:
 - `First paragraph updated`
-

Task 3: Select Elements by Class Name

1. Create **two buttons** with the same class name.
2. Using JavaScript:
 - Select buttons using `getElementsByClassName`
 - Change the text of the **second button** to:
 - `Click Me`

Task 4: Use `querySelector`

1. Create:
 - One heading
 - One paragraph
2. Using JavaScript:
 - Select the **heading** using `querySelector`
 - Change its text color to blue.

Task 5: Use `querySelectorAll`

1. Create an unordered list with **four list items**.
2. Using JavaScript:
 - Select all list items using `querySelectorAll`
 - Change the text color of **all list items** to green.

Task 6: Change Style Using Selected Element

1. Create a paragraph with a class name.
2. Using JavaScript:
 - Select the paragraph
 - Change:
 - Font size
 - Text color
 - Background color

Instructions for Students

- Do NOT use inline JavaScript
- Write all code in `script.js`
- Use:
 - `getElementById`
 - `getElementsByTagName`
 - `getElementsByClassName`
 - `querySelector`
 - `querySelectorAll`
- Use `console.log()` to check selected elements

Submission Instructions (GitHub)

1. Create a **public GitHub repository**
Name format:
2. YourName_DOM_Assignment-2
3. Upload your files:
 - index.html
 - script.js
4. Enable **GitHub Pages**:
 - Go to **Settings** → **Pages**
 - Source: main
 - Folder: /root
 - Save and copy the **live link**
5. Submit on **Google Classroom**:
 - GitHub Repository Link
 - Live Website Link

What You Will Learn

- How to select elements using different selectors
- Difference between ID, class, and tag selectors
- How querySelector works
- How to change styles using JavaScript
