

# JavaScript DOM Assignment #3 – Attribute Manipulation

## Scenario

Web developers often **read, change, add, or remove HTML attributes** using JavaScript. Attributes include: src, href, value, type, placeholder, disabled, etc.

In this assignment, you will practice:

- Getting attributes
  - Setting new attributes
  - Removing attributes
  - Checking if an attribute exists
- 

## Task 1: Get an Attribute Value

1. Create an image with a src attribute.
  2. Using JavaScript:
    - Select the image
    - Get the value of the src attribute
    - Log it in the console.
- 

## Task 2: Change Image Source

1. Create an image showing any picture.
  2. Create a button:
  3. Change Image
  4. When the button is clicked:
    - Change the image src to another image.
- 

## Task 3: Set Attribute to Input Field

1. Create an input field.
2. Using JavaScript:
  - Add a placeholder attribute with text:
  - Enter your name

---

## Task 4: Remove an Attribute

1. Create an input field with:
  - disabled attribute.
2. Create a button:
3. Enable Input
4. When button is clicked:
  - Remove the disabled attribute from input.

---

## Task 5: Check if Attribute Exists

1. Create a paragraph with an ID.
2. Using JavaScript:
  - Check whether the paragraph has a class attribute.
  - Log true or false in the console.

---

## Task 6: Change Link Destination

1. Create a link pointing to any website.
2. Create a button:
3. Change Link
4. When clicked:
  - Change the href attribute to another website.

---

## Instructions for Students

- Use:
    - `getAttribute()`
    - `setAttribute()`
    - `removeAttribute()`
    - `hasAttribute()`
  - Write JavaScript only in `script.js`
  - Test each task in the browser
  - Use `console.log()` for checking
-

## Submission Instructions (GitHub)

1. Create a **public GitHub repository**  
**Name format:**
  2. YourName\_DOM\_Assignment-3
  3. Upload your files:
    - index.html
    - script.js
  4. Enable **GitHub Pages**:
    - Go to **Settings** → **Pages**
    - Source: main
    - Folder: /root
    - Save and copy the **live link**
  5. Submit on **Google Classroom**:
    - GitHub Repository Link
    - Live Website Link
- 

## What You Will Learn

- What HTML attributes are
- How JavaScript reads attributes
- How JavaScript changes attributes
- How JavaScript removes attributes
- Real-life use cases like image switch and form enable/disable
